2.33 (b) (2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

Each research facility shall establish and maintain programs of adequate veterinary care that include the use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries.

The following expired medications were identified during the inspection:

- 1 bottle atropine sulfate; 100 ml; lot # 070367; exp 5/09
- 1 bottle atropine injection; 100 ml; lot # 6071168; exp 7/09
- 3 bottles children's ibuprofen oral suspension; 4 FL oz (118 ml); lot #R02374; exp 7/09
- 1 bottle Tylan injection; 250 ml; lot #A421102; exp 4/09
- 1 bottle doxopram hydrochloride solution; 20 ml; lot #1202942; exp 7/09
- 1 bottle Panacur tablets; 100 count; lot #98037; exp 8/09
- 1 box buprenorphine injection; 10 (1 ml) vials; lot # 1208141; exp 7/09

The use of expired drugs is not considered adequate veterinary care. The medications were immediately removed from and marked for disposal.

Corrected during the inspection

3.54 (a)

FEEDING.

Rabbits shall be fed at least once each day except as otherwise might be required to provide adequate veterinary care. The food shall be free from contamination, wholesome, palatable and of sufficient quantity and nutritive value to meet the normal daily requirements for the condition and size of the rabbit.

Inspection Report

The bag of food in the rabbit room that is currently being used has a mill date of 2/4/09. The other bag of rabbit food that was being kept in the storage room has a mill date of 1/26/09. These bags of food have passed the 6 month window of use, and need to be replaced to ensure that the rabbits' nutritional needs are being met.
